

Drafting (DRFT)

DRFT 107 Technical Graphics 1 – 3 credits , REEL

Involves students in the use of techniques and standard practices of technical graphics so that design ideas can be adequately communicated and produced. Includes free-hand sketching, use of drafting instruments, line work, lettering, orthogonal projections, pictorials, basic dimensioning, and an introduction to computer-aided design drafting. Lab hours are required for this course.

Prerequisite: None

DRFT 151 Introduction to Computer-Aided Drafting (CAD) 1 – 3 credits , REEL

Introduces drafting operations as applied to computer aided drafting (CAD) and the commands and procedures used to create, edit, and plot two-dimensional CAD drawings. Drawing productivity, accuracy, and organizational techniques are emphasized in this course. Assignments will be chosen from various drafting disciplines. Lab hours are required for this course.

Prerequisite: CS 110 or instructor permission

DRFT 210 Advanced Technical Graphics 1 – 3 credits , REEL

Involves students in the use of techniques and standard practices of technical graphics towards the solution of technical design problems, and to communicate and produce design ideas. Includes dimensioning and tolerancing, production of working drawings, and advanced computer- aided design drawing. This course also introduces students to electronic, piping, and welding drawings. Lab hours are required for this course.

Prerequisite: DRFT 107 or ENGR& 121 (was ENGR 111).

DRFT 252 3-D Computer Aided Drafting 1 – 3 credits , REEL

Involves students in the use of parametric solid modeling towards design on three-dimensional part and assembly models. Includes creating part and assembly drawings from 3D models, modifications throughout the design process, and comparing the many parametric solid modeling software packages available. Lab hours are required for this course.

Prerequisite: DRFT 210

DRFT 260 Survey of Civil and Architectural Graphics 3 credits , REEL

A survey course that introduces the student in the use of the drafting standards used by Civil and Architectural disciplines. The concepts of these standards will include: structural graphics, map drafting, architectural drafting, and welding and piping drafting. Lab hours are required for this course.

Prerequisite: DRFT 107 or ENGR& 121 (was ENGR 111) or instructor permission.

DRFT 288 Cooperative Work Experience 1 – 15 credits

Provides work-based learning experience in a specific program of study. Individualized student outcomes are developed, focusing on behaviors that contribute to workplace success.

Prerequisites: Instructor or Cooperative Education Coordinator permission
Concurrent requirements: COLL 289 or BUS 294 must be taken prior to or concurrent with this course.

DRFT 299 Independent Study 1 – 10 credits

Offers individualized learning opportunities for knowledge or skill development. Content and expectations are established between the student and instructor, and documented in an Independent Study contract.

Prerequisites: By instructor permission only.
