

Lower Columbia College Head Start/EHS/ECEAP Classroom Zoning Areas

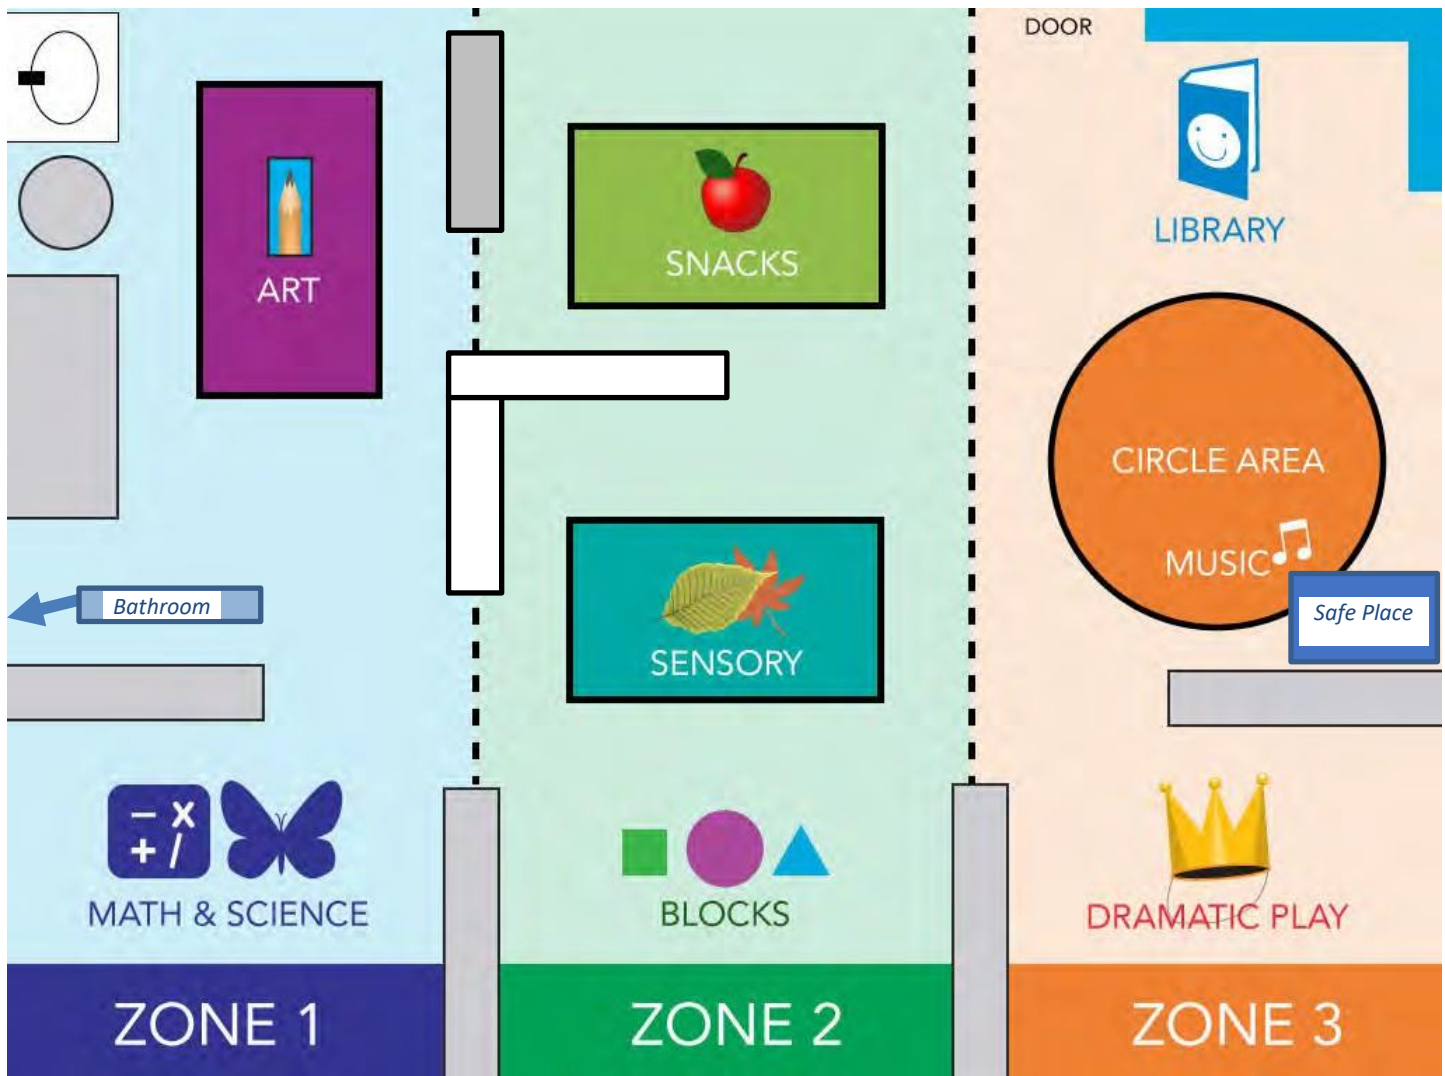

Work with your classroom team to decide how to divide the learning centers and set up a zoning plan in your classroom.

Below is an example of a classroom map with zoning areas. On the next page you will find a blank map.

Directions: With you DST team, sketch a map of your classroom environment then slide the sketch into a sheet protector or laminate. Using dry erase makers, indicate which adult will be in which zone during center times. Use the back of the sheet for the outside environment.

- Remember to include who will supervise the bathroom during specific times and who will supervise doors.
- How will you zone in the Gross Motor Room?
